The above advertisement of this journal we beg to commend to the notice of our readers, and all who are inherested in the progress or state of music in this country. We speak from a knowledge of this paper since its commencement, and most emplaintially give our testimony in favor of its ability. It has supplied the want long felt of a reliable trustworthy, and able record of musical events, rendered almost indispensable in the present time, from the great strides made in the love or art; and, emanating from the very focus of musical intelligence, its opinions have been to us a safe and sure guide in respect to critical knowledge and true taste. Mr. R. Storrs Willis is peculiarly fitted for this post, having devoted his life to the study of the acience and compessition of music, under the best masters of Germany, and is an admirable lecturer upon its philosophy; imparting also write equal deverness the most simple, practical lessons for beginners. Indeed, to mothers who are undergoing the terrible drudgery of teaching, or superintending the musical education of their children, this journal; really valuable from the aid it offers in clear, simple rules for instruction. The criticisms are fearless and refreshingly sensible, with perfect knowledge of the subject discussed. The letters from abroad are highly interesting, and the sketches of artists well written; which added to the pages of music suited to all tastes, from bits of Beethoven and Mendelsohn to the larset Schottusche, render it one of the most welcome arrivals of the week.

VALUABLE IRON WORKS for SALE. ALUABLE IRON WORKS for SALE.—
The Furnace and Forge Property, Manaton House, tenant Houses, with Wood and Farm Lands, Ore Banks and valuable Water Power, situate at McVeytown, Miffin Co., Pennsylvania, in the rich and beautiful agricultural valley of the Juniata River, within one mile of the Pennsylvania Central Radrond, and on the Pennsylvania State Canal, 70 miles west of Harrishurz.

The following description of this property shows its great value in every respect as a site for the manufacture of iron; it certainly not being surpassed by any other location in that rich iron region.

it certainly not being surpassed by any other location in that rich into region.

The Farmace property consists of a first-class water power Charcoal Farmace in good order; eight feet in the both; has made 40 tens of troup per week; large Casting-House and other furnace buildings; hot or cold Blast; Blowing Cylinders and Hot Blast Fipes at the tunnel bead, of the most approved construction, and in perfect order; ample water power, dam 460 yards above the furnace; overshot waterwheel, 24 feet in diameter; fine Coal House; 21 first-class Dwellings, for hands; extensive Stabling.

The location of the above is well made, and in respect of proximity to material of all kinds, access to market and character of construction of machinery and buildings, cannot be improved. \$1,00 would be ample to cover all repairs necessary to furnace and buildings, prior to active operations.

seven fires blown by a 3th both extent course; water power ampile for trip hannes; 12 to 15 first class houses for hands.

The celebrated Greenwood Ore Bank belongs exclusively to this estate. This ore bank is well known as one of the richest deposits of pipe ore, and most of the furnaces in the neighborhood have used it. By mixing it with the poorer ores of the vicinity, an A No. I set Charcoal from is produced—blooms made from which are now selfing at Std per tan. Considerable revenue is now derived from ore leave granted on this bank to thomoces in the region. There are several other banks of ore of different varieties on and near to the lands of this property.

A Quarry of pare Limestone is on the promises, within 50 varids of the furnace. There are 400 acres of band attached to this Estate, embracing wood land, ore land, and some valuable farm land; a water right on the creek, between the farmace and forge.

Both furnace and forge can be not into active working, in from eight to be a weeks, to produce a fine quality of iron, in demand at high prices, and the production of which in other quarters, from variacon causes, must be limited.

It can be shown that, at the price asked for the whole property, it would clear itself in two years.

For terms and further particulars, suply personally, or by Lotwille, Schuylkill Co., Pa., or to H. N. EURBOUGHS, Esq., No. 73 Market-st., Philadelphia.

FOR SALE—The Lease and Furniture of
